### FOREWORD

I am pleased to write this Foreword to the ESSENTIAL DRUG LIST being published by the Directorate of Health Services. There is always a need of regular publication of such a list which will help Medical and Paramedical staff to be apprised of drugs available in their establishments.

The publication of this list is an important step in implementing the programme of rational use of drugs.

I sincerely thank all the members of the Committee who have finalised the list of Essential Drugs.

### MESSAGE

In the NCT of Delhi, Central Procurement Agency for Drugs has been making available only those drugs which are in the **ESSENTIAL DRUGS LIST**. Doctors and Paramedical Staff should be aware of drugs which are available in their Hospitals/Health Outlets.

I hope Doctors and Paramedical Staff working in Government of Delhi Hospitals/Health Centres will be benefited by this publication.

### ACKNOWLEDGEMENT

Essential Drugs List of Govt. of Delhi was first prepared in the year 1994. The present issue is the fourth revision of the list. I am grateful to the members of Committee for selection of Essential Drugs List. Without their technical advice it would not have been possible to bring out revision of the Essential Drug List.

## PREFACE

The list of "Essential drugs" for hospitals, dispensaries and health centres in the National Capital Territory of Delhi is dynamic in true sense. The present issue of the list is the result of fourth revision of the list. Each time the revision has been made through a participatory mechanism. For the present revision, two meetings of the Committee constituted by Govt. of NCT of Delhi were held. The first meeting was held on 25.7.2001 and 2nd on 29.8.2001. The committee reviewed the recommendations received from different hospitals and other health facilities. The merit of each drug for inclusion was considered based on the criteria recommended by WHO i.e. Scientific evidence of efficacy, safety and cost. After extensive discussion 25 active molecules by generic name were added and equal number was deleted. Thus the numbers of drugs in this list remained unaltered.

The committee is grateful to Prof. Ranjit Roy Chaudhury, Coordinator of India WHO Essential Drugs Programme and Advisor to the Committee for his constant valuable inputs at each step of revision of the list.

Certain drugs because of their cost or because they should be used only by specialists, have been classified under the category SELECTIVE DRUGS. This is denoted by an asterisk(\*), these drugs marked (\*) may be procured in small quantities and their prescribing may be monitored. Each hospital should work out its own mechanism for the prescribing of these drugs. The drugs selected for outpatients will be available to inpatients also.
